

## INSTRUMENT FLIGHT RATING INSTRUCTION ON THE MOVE

**Sunday July 25 to Friday August 6**

[www.airrally.com](http://www.airrally.com)

A unique opportunity to enjoy the company of pilots from various countries, experience the freedom and beauty of flying in the wilderness, share a passion while improving skills or qualifying for your IFR rating and HAVE FUN !!!

### **Instrument Rating**

Avoid the inconvenience of after work night classes or week ends away from home enduring many unproductive and frustrating months with little or no progress. We know what you are going through, postpone, register & cancel and years go by ... result: you are grounded 8 months out of the year ! It is over ! Now is your chance. We can help you with IFR volunteer instructors onboard, ready to coach & train for 13 consecutive days, 12 hours a day

2009 Cross Canada challenge was the first introduction to this "IFR on the Move" program! From this experience we have created a program with training sessions providing intense instrument flight training. Whether you have your personal IFR instructor onboard or you are matched with one, you will benefit from an IFR ground training program provided by a CFII professional volunteer.
